

# GRANULAR GYPSUM

## 21% Calcium

High analysis calcium present in the sulphate form

### 2 Granule Sizes Available

Coarse Grade	Greens Grade
Suitable for fairways, sports fields and other turf areas maintained at a height of cut above 15mm	Ideal for golf greens, bowling greens and other turf areas maintained at a low height of cut.

### Benefits

- Calcium sulphate wont impact soil pH levels
- Calcium assists in developing strong plant cells
- Strong cell walls help resist impact of pathogens
- Corrects calcium deficiencies in the soil
- Flocculates the soil to improve water and air movement
- Displaces sodium from cation exchange sites

### Application Rate:

500–1000Kg/Ha

The application rate of granular gypsum should be determined following the results of a soil nutrient analysis

**Available in 25Kg bags**
