

TRIPLE S

STRESS SUPPORT SYSTEM

Proprietary formulation of amino acids, peptides, humic fractions, mono-saccharide sugars, saponins, fermentation enzymes, and growth hormones to supplement and support plant physiological functions when subject to sub-optimal light or high stress conditions. Maintains turf colour and growth during winter.

Directions for use:

Situation	Rate	Comments
Turf Improve turf stress tolerance Enhance winter colour and growth	5L / Ha	Apply maintenance rates at 5L / Ha to turf under stress such as from shade, salts, and temperature, or to maintain turf colour and health during winter. Repeat monthly as required, up to fortnightly during high stress periods or cold temperatures. Use higher 10L / Ha rate to promote turf growth and recovery.
Turf recovery Accelerate turf growth	10L / Ha	Apply in a minimum water volume of 400L / Ha. Do not use within 4 weeks of a trinexapac-ethyl product application. Do not apply to cool season turfgrass species.

Tank Mix Flexibility: All tank mix combinations have not been tested on all varieties and all environmental conditions. Limited areas should be tested and reasonable judgement made. Jar test is recommended prior to broad use.

CAUTION

Keep out of reach of children, product may cause irritation to eyes and skin. If splashed in eyes or on skin wash with ample fresh water.

Refer to Material Safety Sheet before handling product.

NOTICE

This product is designed for the particular purposes indicated on this label. Failure to use the product strictly as directed may be illegal, prove dangerous and render the product ineffective.
