

Strong and economical Spring Dead Spot control

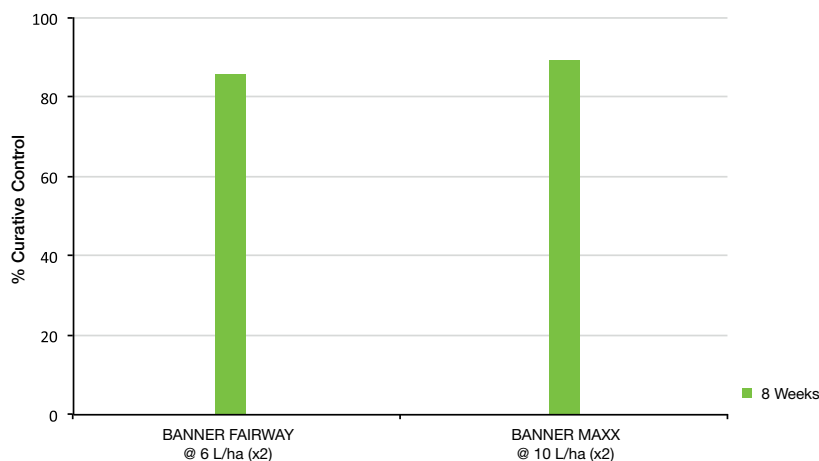

syngenta®

BANNER FAIRWAY Turf Fungicide is an excellent choice to use on larger turf areas like fairways, sporting ovals, polo fields, racing tracks and parks. It is registered at a rate that is suited to preventative Spring Dead Spot programs.

What BANNER FAIRWAY offers you:

- Effective and economical Spring Dead Spot control
- Fast absorption and even systemic movement through the turf roots to get where it is needed
- Low odour, non-staining formulation

Spring Dead Spot Control
(2 applications, 4 weeks apart in autumn)

SpraySURE | Accuracy and Performance

To achieve great results, accurate application is important.

Target	Syngenta Nozzle	Optimal Water Rate	Optimal Pressure Range
Root and soil So	XC 08	~1000 L/ha	2 to 4 bar

BANNER FAIRWAY is an excellent choice to use on larger areas such as fairways, sporting ovals, polo fields, racing tracks and parks. The fast absorption and systemic movement combines to ensure effective “stopping power” for early curative and preventative situations. The 6 L rate is suitable for use in preventative SDS programs. Two sequential applications on a 28 day interval is most successful.

Example: For fairways and fields, apply BANNER FAIRWAY in late February with a second application in late March (1 month later).

For higher risk areas, i.e. areas with recurring disease, apply BANNER FAIRWAY in late February and again in late March but then follow up with HERITAGE MAXX in late April.

Target Diseases	Rate	SpraySure
Spring Dead Spot	6 L/ha	So

Refer to the registered label for full details and instructions for use. **F** = Foliar applied **So** = Soil applied **Su** = Surfactant required

Active Ingredient

BANNER FAIRWAY contains 250 g/L propiconazole, a member of the demethylation inhibitor fungicides

GROUP **3** FUNGICIDE

Formulation and Packaging

20 L pack size

An emulsion concentrate (EC) with minimal odour.
