

## NOW IS THE TIME TO TREAT PONDS NATURALLY

### Product Attributes

- Improves water clarity
- Safe, natural, and 100% biodegradable
- Easy to use, no mixing required
- Targets suspended organic matter
- Reduces sludge layer
- Replaces chemicals and copper

### When to use BLAST

- To control algae blooms and manage temperature spikes
- When starting a new pond with an unknown history
- To speed up results
- Initial treatment of the season
- When high amounts of organic matter are found throughout the water column

### Dosage

One packet will treat 450,000 Litres of water. BLAST can be applied every 7 days.

### Directions

Calculate pond volume:  $Length \times Width \times Depth \times 1000 = Total\ Litres$

#### Pond Treatment (based on number of Litres)

- Add 1 BLAST packet for every 450,000 Litres of water  
*Example: To treat 1,800,000 Litres of water it requires 4 BLAST packets*
- Repeat every 7 days until desired water clarity is achieved

#### Application Directions

- Start treatment as soon as water reaches 7 Degrees Celsius
- Distribute water soluble packets evenly throughout pond
- Repeat every 7 days until desired clarity is achieved
