Trichoderma koningii &
Trichoderma harzianum 5 x 10⁷/gram

Product Information

About Promote®

Promote® is a biological soil and/or root beneficial inoculant designed to increase beneficial microbial activities in the rhizosphere. It contains a high concentration of selected beneficial fungi, *Trichoderma spp.*

Promote® can improve soil structure. The organisms in this product produce compounds that help form aggregates in the soil to improve soil porosity.

Promote® can be applied as a foliar spray, seed soak or through irrigation systems. When properly applied to the soil, **Promote®** will multiply and produce factors which can stimulate plant growth.

Large populations of beneficial microorganisms present in **Promote®** also crowd out pathogens, preventing them from becoming established.

Promote® will assist with increasing healthy root mass.

Directions & General Recommendations

Application Rates

Greens, tees, fairways & sporting fields:
Apply 2 – 4kg / Ha. Apply with boom or fish mouth early morning or late afternoon, then irrigate through to root zone.

Seed germination:

Apply 1– 2kg / Ha after seed has been spread. Wash in if necessary. Apply with 2Kg / Ha of **Humic80®**.

Seed divots:

Apply 2Kg to 1Tonne of seed, or 5 grams to each seed bucket and mix in well before applying to divots.

Product Handling

How to clean spray tank, filters, & accessories:

Remove spray tank filters. Soak them for 3 - 4 hours in a concentrated Urea solution (2Kg of Urea in 10 Litres of water).

Dissolve 5 Kg of Urea in a 1000 Litre spray tank. Run the pump until all hoses and nozzles are filled with Urea solution. Flush filters and spray tank prior to spraying.

Presoak **Promote®**, minimum 3hrs prior to spraying in a clean bucket of clean water to activate the product.

When applying through a boom spray, take out filters and apply. The carrier may block fine nozzles and filters.

After soaking, strain the carrier from the liquid then apply to tank.

Compatibility

ALWAYS perform a compatibility test (jar test) before mixing anything with **Promote®**.

Promote® can be applied with some herbicides, pesticides, fertilisers, natural wetting agents and other organic products.

Promote® is INCOMPATIBLE with fungicides, Copper, Chlorine, any fumigation products, anti-fungal products, as well as ammonium based fertilisers.

KEEP OUT OF REACH OF CHILDREN
