APPLICATION GUIDE

TX10 Outfield is a granular multi-purpose sports grass fertiliser for use in a wide variety of surface conditions from base feeding on sandy root zones to wear tolerance on high usage swards. Ideal for fairways, sportsfields, race tracks and open spaces.

ALL YEAR

STANDARD RATE:
Apply at 3kg/100m²

HARD WORKED AREAS:
Apply at 4-6kg/100m²

10-12 weeks release

NEW CONSTRUCTION AND TURF RENOVATION

Apply at 5kg/100m²

- » Turf laying, re-seeding and repair of bare or thin areas.
- » Ideally, blend with the root zone soil and leave to stand for two weeks.
- » Alternatively, rake half into the top 5cm of soil prior to seeding or turf laying. Apply the balance once grass is up or laid turf has bedded in.
