

TX10 OUTFIELD

5-2-8 WITH WETTING AGENT + MYCORRHIZA

FERTILISER ANALYSIS

5%	Total Nitrogen (N)
	1.4% organic
	1.9% ammoniacal
	0.5% nitrate
	1.2% ureic
2%	Total Phosphorous (P)
	0.4% water soluble
	1.3% citrate soluble
	0.3% insoluble
8%	Total Potassium (K)
	0.7% organic
	7.3% water soluble
3.1%	Total Sulphur (S)
	1.7% inorganic
	1.4% organic
4.2%	Total Calcium (Ca)
	4.2% organic
0.8%	Total Magnesium (Mg)
	0.8% organic
0.5%	Total Iron (Fe)
	0.4% organic
	0.1% sulphate

PRODUCT OF AUSTRALIA

This fertiliser also contains traceable levels of Cu, Zn and Mo and is in the slightly acidic to neutral range. Nutrient sources include the Terralift organic complex, plant extract, animal proteins, marine protein and seaweed.

TX10 Outfield is a granular multi-purpose sports grass fertiliser providing high levels of humic acids, fulvic acids, plant growth regulators, enzymes and amino acids to produce a strong dense sward and better soil root zone health for longer lasting grass.

APPLICATION GUIDE

Fairways, sportsfields, race tracks and open spaces.

☞ 3kg/100m² standard rate

4-6kg/100m² hard worked grass

2kg/100m² lightly worked areas or base feeding

New construction and turf renovation - 5kg/100m²

Ideally blend with the root zone soil and leave to stand for 2 weeks. Alternatively, rake half into the top 5cm of soil prior to seeding. Apply the balance once turf is up or laid turf has bedded in.

⌚ 12 weeks release. May be applied monthly.

☀️ All year

🧺 Best applied using a fertiliser spreader. May be spread with a sand fill or top-dressing if desired (blend with top-dressing or apply under top-dressing and brush in).

⚠️ Very low scorch risk, watering-in recommended.
