

SUMMERSOAK A+

Concentrated Soil Surfactant + Amino Acids

Summersoak A+ is a concentrated soil wetting agent with amino acids to assist in overcoming localised Dry Patch and general water repellence in the soil profile.

Summersoak A+ contains quick acting surfactants combined with other long-lasting soil surfactants. This allows for fast correction and longer residual wetting effects.

Summersoak A+ enhances overall infiltration and dispersion of water in profile by overcoming water repellence factors caused by thatch and organic acids attached to soil particles.

AMINO ACIDS

Stressful conditions, such as high temperatures, low moisture, frosts, parasite attacks, flooding, disease or phytotoxic effects have negative effects on metabolism with a corresponding decrease in quality and resistance. The application of amino acids before, during and after stressful conditions provides plants with amino acids that are directly related to physiological stress - therefore providing a prevention and recovery effect.

ANALYSIS:

A Blend Of Non-Ionic Surfactants

AMINO ACIDS:

Alanine, Arginine, Aspartic Acid, Glutamic Acid, Glycine, Hydroxylysine, Hydroxyproline, Histidine, Isoleucine, Leucine, Lysine, Methionite, Ornithine, Phenylalanine, Proline, Serine, Threonine, Tyrosine, Valine.

DIRECTIONS FOR USE:

APPLICATION	Rate	Notes
TURF	5 mL / m ² 500 mL / 100 m ² 50 L / Ha	

APPLICATION NOTES:

Following application, apply heavy watering to wash Summersoak A+ into the ground. This will also prevent burn to the leaf. Apply in cool of day.

During very hot conditions, a second application may be necessary. Do not apply Summersoak A+ with other chemicals. Allow one week between applications.
