

# AXCELLA 2 TURF TYPE ANNUAL RYEGRASS

Axcella 2 is the second generation of commercially available turf type annual ryegrass. It was developed from unique dwarf annual ryegrass plants that exhibit greater shoot density, narrower leaf blades, less vertical leaf growth, and a darker green leaf colour than standard annual ryegrass cultivars.

### Features and Benefits:

- Rapid Establishment
- Excellent cold weather establishment
- Strong winter activity
- Forms an attractive hard wearing sportsfield surface
- Excellent transition in warm conditions

Density	Colour	Disease Resistance	Wear Tolerance
■ ■ ■ ■ □	■ ■ ■ ■ □	■ ■ □ □	excellent

### Warm season sow rate:

4-6kg/100m<sup>2</sup>
