

Kerbside

Key features:

- Diverse species mix
- Rapid establishment, even in difficult sowing conditions
- Suppression of undesirable weeds
- High turf quality even under minimal management inputs

Kerbside contains a blend of fast establishing hardy cultivars ideal for sowing into nature strips and sites under development. Often these sites have limited-to-no water supply and are devoid of nutrients. Kerbside will ensure turf grass quality is produced for an economical price.

Species

Perennial ryegrass

Chewings fescue

Browntop

Application rates

Sowing rate: 30 - 50 g/m² (3 - 5 kg/100 m²)

Mowing height

Down to 25 mm
