

# N-LIFT

Proactively schedule the essential nutrient applications made to your turf with one of the enhanced nutrient formulations in the **N-LIFT** Stabilised Fertiliser Range.

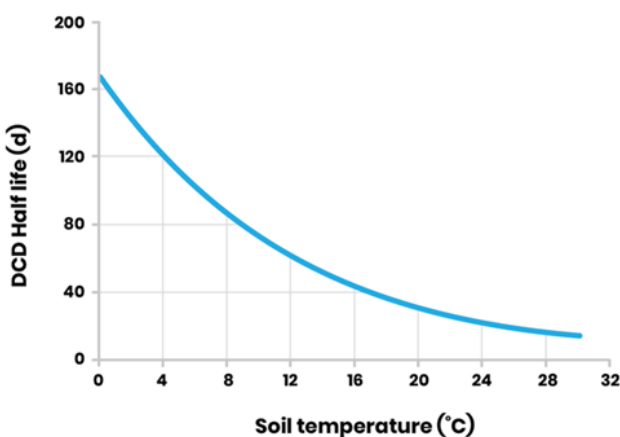

## STABILISED FERTILISERS

*Formulated using DCD*

*The active ingredient used in **N-LIFT** Stabilised Fertilisers is the bacteriostatic nitrification inhibitor Dicyandiamide (DCD).*

***The most widely used nitrification inhibitor in the world.***

**N-LIFT** Stabilised Fertilisers are formulated using a uniform coating of DCD to stabilise nitrogen in the root zone and reduce nutrient losses. This ensures the effective delivery of plant nutrients for efficient turfgrass growth and development.

Trials indicate that the half life efficacy of DCD is:

- 14 days at 28°C
- 30 days at 20°C
- >12 weeks at 10°C

*Protect your nitrogen investment without compromising soil health*

- Existing nitrogen fixing bacteria in the soil population are not impacted on by **N-LIFT**.
- Non-toxic to ammonia and nitrite-oxidising bacteria.
- Provides nitrogen to the turf in the plant available ammonium form.
- Safe for the user and the environment.
- Formulated and packaged in Australia.

## The Range

# N-LIFT

## STABILISED FERTILISERS

<b>N-LIFT 46</b>	Pack Size: 25 Kg & 1000 Kg
<b>TYPICAL ANALYSIS 46 - 0 - 0</b>	
The driving force behind N-LIFT Stabilised Fertiliser Blends. This is a urea granule that has had DCD nitrification inhibitor uniformly applied at the time of blend production.	
<b>Application Rate</b>	<b>100-200 Kg/Ha</b>
<b>N-LIFT 33</b>	Pack Size: 25 Kg & 1000 Kg
<b>TYPICAL ANALYSIS: 33 - 0 - 11</b>	
A high analysis nitrogen and potassium fertiliser to provide continued turfgrass growth and development. 93% of the total N is present as N-LIFT.	
<b>Application Rate</b>	<b>100-200 Kg/Ha</b>
<b>N-LIFT 25</b>	Pack Size: 25 Kg & 1000 Kg
<b>TYPICAL ANALYSIS: 25 - 1 - 11 + 2.5% Fe</b>	
A general purpose maintenance fertiliser suitable for application in all broad-acre turf situations. 88% of the total N is present as N-LIFT.	
<b>Application Rate</b>	<b>150-250 Kg/Ha</b>

<b>N-LIFT 24</b>	Pack Size: 25 Kg & 1000 Kg
<b>TYPICAL ANALYSIS: 24 - 4 - 8 + 2% Fe</b>	
An economical NPK + Fe fertiliser blend for use in broad-acre turf situations. 74% of the total N is present as N-LIFT.	
<b>Application Rate</b>	<b>150-250 Kg/Ha</b>
<b>N-LIFT 22</b>	Pack Size: 25 Kg & 1000 Kg
<b>TYPICAL ANALYSIS: 22 - 2 - 8 + 6% Fe</b>	
A high iron formulation to deliver rapid green-up. A measured turfgrass growth response is achieved by 82% of the total N being present as N-LIFT.	
<b>Application Rate</b>	<b>150-250 Kg/Ha</b>
